

# dBMEDx Announces Supply Agreement with Direct Supply®

LITTLETON, CO. September 25, 2017 -- dBMEDx, Inc., a privately-held, wireless medical device company, announced today that it has entered into a definitive supply agreement with Direct Supply®, the nation's leading provider of equipment for the Senior Living market. Under the agreement, dBMEDx will integrate their proprietary bladder scanning technology into a new Direct Supply® device to create the first wireless bladder scanner optimized for use in long term care settings.

dBMEDx has developed and patented a novel, wireless scan engine that provides an unparalleled level of automation for measuring bladder volume. The dBMEDx BBS Revolution™ bladder scanner is a next generation scanner that offers nurses a simple and fully automated bladder volume measurement solution to help them reduce the incidence of urinary tract infections, one of the most common healthcare infections. The BBS Revolution™ is FDA cleared and CE marked and is commercially available in both the US and Europe.

"We are excited to work with Direct Supply® to create a bladder scanner that is optimized for the long-term care market," said David Shine, CEO of dBMEDx. "Urinary tract infections are a significant problem for senior care and better tools are needed. Combining our advanced technology with Direct Supply's® market access and industry leading customer service is a powerful way to address this need and improve the quality of care."

## **About dBMEDx, Inc.**

dBMEDx is a privately held, growth stage, wireless medical device company focused on products to reduce healthcare acquired infections. The company has developed novel, automated scanning technology with a wide range of medical applications. The first commercial product with this technology is the BBS Revolution™ bladder scanner, the first fully automatic bladder scanner, which was developed by the engineers who designed the original bladder scanning technology. The BBS Revolution™ is manufactured in the USA and currently being sold in the US and Europe. For additional information, please visit <http://www.dBMEDx.com>.
